

# Analysis Taxi Update

- Next Taxi Deadline: Taxi 111 → Wed. July 30, 11:59 pm EDT.
- Currently processing the Run7AuAu200 dataset. It is 25% complete, and should finish tomorrow.
- Pending datasets for taxi 110: Only Run4AuAu200, to be submitted tomorrow.
- The train was delayed over the weekend due to a disk quota problem on the /phenix/hp disk. That has been resolved.
- NOTE: It is important to try and benchmark your module's memory use before registering. If you are pushing 1 GB, you will likely get evicted from the train.
